

Model:	Service Checker Hub 4 Call Intent Model (Unreliable Wi-Fi)		
Target:	Call intent is 'Unreliable Wi-Fi' in a Hub4 Service Checker call	Owner:	Davut Jones
Eligibility:	Hub4 customers with scaled data (c. 3m)	Version:	Last Updated : 14/04/2026

Features Importance – key attributes driving model prediction

Statistics Summary

Additional Information

Model Type:
Light Gradient Boosting Model (LGBM)

Model Type Context:
Light GBM is a highly efficient and scalable gradient boosting widely used machine learning model created by Microsoft. It is particularly effective at handling classification, regression and ranking tasks.

Model Description:
LGBM builds model sequentially, each new model correcting errors made by the previous one. Top features are discretized into bins and grows tree leaf-wise to a maximum depth of accuracy.
